A SMALL separate impression of Part III is issued for the convenience of collectors and students specially interested in the classes of coins treated in this Part, who may not care to purchase the complete volume. The General Introduction, General Index, and complete Tables of Weights and Measures appear in that volume only. Here it may be noted that a millimetre is almost exactly $\frac{1}{25}$ th of an inch, or, in other words, one inch is very little more than 25 millimetres; and that ten English grains are equivalent to .648, almost two-thirds of a gramme. Weights are given in English grains, and measurements in decimals of an inch.

THE SASSANIAN DYNASTY OF PERSIA

INTRODUCTION¹

THE Sassanian dynasty of Persia, which succeeded the Arsakidan, lasted for more than four centuries, from 226 to 651 A.D. The following list of the kings was compiled by the late Mr. E. Thomas, chiefly from Armenian authorities, with corrections from independent sources (*Num. Chron.*, 1872, p. 44; *Sassanians in Persia*, p. 12). Other authors vary the spelling of the names, and give the dates with some differences.

THE SASSANIAN DYNASTY.

	Accession A. D.
1. Ardeshr̄ I, Bābekān	226
2. Shāpūr I	240
3. Hormazd I	271
4. Varahrān (Bahram) I	272
5. Varahrān II	275
6. Varahrān III (Segān Shāh)	292
7. Narsahi (Narsēs, <i>Ναρσης</i>)	292
8. Hormazd II	301

13. Yezdegird I (Bazah-Kār)	397
14. Varahrān V (Gōr)	417
15. Yezdegird II (Sipāh-dost)	438
16. Hormazd III	457
17. Firōz	459
18. Vagharsh (Báλας)	486
19. Kobād (Nekrāi, 'the Wise,' <i>Καβάδης</i>)	490 ²
20. Khusrū I (Naushīrwān)	530-1
21. Hormazd IV (Türk-zādah)	578

¹ Special abbreviations in this Section are:—B. = Bartholomaei; D. = Drouin; K. = Kufic; L. = Longpérier; P. = Pahlavi; Th. = Thomas. The Sassanian coins, although not Indian, served as the model for long series of Indian coinages (post, Section XIII), and are included in the catalogue at the request of the Trustees of the Indian Museum.

² Th. omits Jamasp, who, in 498 A. D., temporarily took the place of his brother Kobād (L., p. 70).

	Accession A. D.
22. Khusrū II (Parvīz)	590
23. Kobād [II] (Shīrāiah, Al-Ghashūm, 'the Iniquitous')	628
24. Ardešhīr III	628
25. Shahr-yār (Khorham, Σαρβάρος)	629
26. Purān-dukht (daughter of Khusrū Parvīz)	630
27. Khusrū [III]	631-2
28. Azarmi-dukht (daughter of Khusrū, widow of No. 25)	
29. Hormazd [V]	
30. Yezdegird III (son of No. 25, according to Persian authorities; or son of Kobād and grandson of Khusrū, according to Armenian chronicles)	632 (16 June) to 651

[Yezdegird lived until September 651, but the Sassanian power was destroyed by the Arabs at the battle of Nahavend in 641.]

The coinage exists in three metals—gold, silver, and copper. The gold coins seem to be scarce, but examples of the other metals, especially the silver, are abundant. The gold pieces, like the Kushān and Gupta gold coinage in India, are struck to the standard of the reduced Roman *aureus*. The only gold coins included in this catalogue, three specimens of Shāpūr II (309–80 A. D.), range in weight from 109.2 to 112.3 English (Troy) grains (= about 7.2 grammes), and so agree with the *aureus* of 45 to the pound. The heaviest specimen of Shāpūr I (240–71 A. D.) in the British Museum weighs 113 grains, and was struck to the same standard. The gold coinage of Shāpūr III (384–6 A. D.) was struck to the Constantinian standard of 72 *aurei* to the pound, and does not exceed 70 English grains (about 4½ grammes) in weight.¹

The silver coinage, on the other hand, as in India, was regulated by the standard of the Greek drachma; and some of the copper coins seem intended to follow the same scale of weights.

The gold and most of the copper coins are thick in fabric, and of moderate diameter. The silver pieces are nearly all extraordinarily thin and broad, the breadth increasing in the later reigns, and attaining its maximum, 1.35 inch, in the seventh century under the Arab governors, who copied the issues of Khusrū II.

The type of the Sassanian coinage varies little throughout its long history; the obverse being occupied by the king's bust, almost always turned to the right, and the reverse by a portable fire-altar, with different accessories. On the earliest coins of the first king, Ardešhīr Bābekān, the royal portrait is distinctly Parthian, being, in fact, copied from the likeness of Mithradates; but, even during Ardešhīr's

¹ The weights cited by L. (pp. 13, 14) are given in Paris grains.

reign, the characteristic Sassanian crown surmounted by a globe was introduced, and the portrait lost its purely Parthian look. Wings, as an appendage to the globe, first appear on the coinage of Fīrōz (459-86). Khusrū II (590-628) dispensed with the globe, and adopted a peculiar form of winged head-gear, which continued in use, without material change, to the end of the dynasty, and was copied by the Arab governors down to the closing years of the seventh century. The legends, in the old Persian language and Pahlavī character, are exceptionally difficult to read and interpret; and satisfactory arrangement of the coins would be almost impossible but for the circumstance that nearly every king prior to Khusrū II adopted a distinctive form of head-dress, as well as peculiar modifications in the accessories of the type. The latest coins bear supplemental inscriptions in the Arabic language and Kufic script.

No information is available concerning the *provenance* of the coins now catalogued, which form a fairly representative set, although its deficiencies are numerous.

Interest in the Sassanian coinage seems to have died out of late years, and nearly all the standard publications on the subject are old. No satisfactory complete account has been published. Longpérier's valuable *Essai sur les Médailles des Rois Perses de la Dynastie Sassanide* (Paris, Didot), appeared in 1840, and naturally contains some serious errors (corrected in *J. R. A. S.*, 1850, p. 254, note; *ibid.*, 1852, p. 407; quoting Mordtmann in *Z. D. M. G.*, vols. viii, xii). The numerous papers by Mr. Edward Thomas are widely scattered. Those contributed by him to the *Num. Chron.* in 1872 and 1873 were reprinted (Trübner, 1873) under the title *Numismatic and other Antiquarian Illustrations of the Rule of the Sassanians in Persia from A. D. 226 to 652*, or more briefly, *Sassanians in Persia*. This work (p. 11) gives a bibliography of the subject.¹ The most important other papers by Mr. Thomas are 'The Pehlvi Coins of the Early Muhammadan Arabs' (*J. R. A. S.*, 1850, vol. xii); and 'Notes Introductory to Sassanian Mint Monograms and Gems, with a Supplementary Notice on the Arabico-Pehlvi Series of Persian Coins' (*ibid.*, 1852, vol. xiii). A summary description of the coins of each reign will be found in Canon Rawlinson's work, *The Seventh Great Oriental Monarchy*, which is the most convenient presentation of Sassanian history for English readers. The best collection of plates is that published by M. Dorn (St. Pétersbourg, 1873), entitled *Collection de Monnaies Sassanides de feu le Lieutenant-Général J. de Bartholomaei*, but no text accompanies the 32 plates.

¹ Not to be confounded with another book by Mr. Thomas entitled *Early Sassanian Inscriptions and Coins; and Numismatic and other Antiquarian Illustrations of the Sassanians in Persia*, 2 vols., 1868-73. See Postscript, *post*, p. 231.

If specialists should discover defects or errors in my description of the Sassanian coins in this catalogue, I trust that the admitted difficulty of the subject may be deemed sufficient excuse. Dr. Codrington kindly guided me to the necessary books, but I have been obliged to do the best I could with the coins.

No. 3. HORMAZD I; PROVINCIAL COINAGE IN (?) SĪSTĀN, BY (?) ARDAMITRA, ABOUT 271 A. D.

Copper

1	A.S.B.	Æ 99 .9	Parthian head l., with mass of hair behind as on coins of Pakorēs (<i>ante</i> , p. 58); legend lost.	Low fire-altar, without attendants, and with incense vessels, as on coins of Ardeshrī I. P. legend, l. <i>𐭠𐭣𐭠𐭣</i> ; r. <i>𐭠𐭣𐭠</i> . The rev. is slightly concave.
2	"	Æ 78 .8	Similar.	Similar; only a few characters visible.
3	"	Æ 95.5 .92	Ditto.	Ditto; nothing legible.
4-9	"	Æ —	Ditto.	Ditto; ditto. ²

¹ *Shahpūharī* = mod. Pers. *shahzāda* (*shāhshāda*), 'king's son,' used as a proper name; Lat. *Sapor*; Gr. *Σαράπ*. The spelling *Shāpūr* is that used by Mr. Thomas.

² M. Drouin (*Rev. Num.*, 1895, p. 52, Pl. II, 1-8; quoted by Rapson, *J. R. A. S.*, 1904, p. 678) found what he calls 'the normal legend of Hormazd I' on obv. of similar coins, and on rev., in at least one case, the name *Ardamitra*. The specimens figured by him came from Turkestan; that described by Mr. Rapson from Sīstān. The provenance of the coins now catalogued is not recorded. The legend on No. 1 is not *Ardamitra*.

No. 7. NARSAHI (NARSĒS), 292-301 A. D.

Silver

1	I.M.	Æ 58.5 1.0	Bust of king r.; beard tied, with pendant; crown foliated, ¹ with globe above. Legend, very corrupt, intended for <i>Mazdisan bagī Narsahi markān markā minūchatrī min Yazdān</i> .	Fire-altar on two-stepped base, with three pellets on shaft; on l., the king turned towards altar with sceptre (spear), sword, and globed crown; on r., attendant turned towards altar with spear and sword. Two symbols above, the 'fero-har' and 'taurine'. Legend, r. <i>Narsahi</i> ; l. <i>nūrā zi</i> , corruptly written.
---	------	---------------	--	--

No. 8. HORMAZD II, 301-9 A. D.

*Copper**Ormazd type*

1	A.S.B.	Æ 34.2 -63	Bust of king r., with short tied beard; lion's head and mane as crest on front of head-dress, which is surmounted by a flower (? rose) in place of the usual globe. Traces of legend <i>Auharmazdī</i> in front of face.	Fire-altar on broad base, with bust of Ormazd rising from top—his arms extended, r. hand holding royal diadem, and l. hand a spear. Traces of legend (Pl. XXIV, 3).
2	"	Æ 31.8 -62	Bust of king r., with short tied beard; crown or diadem has five pellets, but no lion's head; the usual globe above. Legend in front of face <i>Auharmazdī</i> , behind head <i>malkā</i> , 'King Hormazd.'	Device as on No. 1. Th. (p. 41) reads <i>Avasta mūrta</i> , 'image of Avasta,' or 'Ormazd', but I cannot make out more than <i>astamū</i> (Pl. XXIV, 4). Perhaps the true reading is <i>apasta</i> , 'confidence,' D.
3	"	Æ 22 -6	Bust of king r., with a three-pointed crown; no globe, flower, or lion's head; no trace of legend.	Same device as on Nos. 1 and 2, treated slightly differently; legend illegible; in poor condition.

Thick, heavy altar type

4	A.S.B.	Æ 53 -56	Bust of king r.; lion's head on front of head-dress; no legend.	Altar with heavy base and top filling field; symbols on shaft. No legend; rude, polygonal piece (Pl. XXIV, 5).
---	--------	-------------	---	--

¹ Canon Rawlinson describes the foliated branches as 'horns of ibex or stag'.

8	"	Æ 59.2 .66	Somewhat similar; lion's scalp indistinct; in legend opposite face <i>ma</i> legible.	Altar of different form, filling field; no legend.
9	"	Æ 64 .71	Generally similar.	Altar of same shape as Nos. 3-7.

No. 9. SHĀPŪR (SAPOR) II, ZU'LAKTĀF, 309-80 A. D.

Gold

1	I.M.	Æ 109.2 .76	Bust of king r.; beard short, with pendant; crown three-pointed, with globe. Legend, beginning in front of face, difficult to read, seems to be <i>Mazdisan bagī Shahpūhari malkān malkā</i> , 'The worshipper of Ormazd, divine S., king of kings.'	Broad-topped fire-altar, without attendants, flanked by incense vases, as on coins of Ardeshr I. Marginal legend uncertain; to r. of altar <i>malkāi</i> , 'royal' (Pl. XXIV, 6; see L., Pl. VI, 2; Th., <i>Num. Chron.</i> , 1872, p. 273).
2	"	Æ 109.5 .77	Similar; legend obscure.	Similar; legend marginal only, not read.
3	"	Æ 112.3 .8	Ditto; ditto.	Ditto; ditto; legend at top (B., Pl. VII, 6).

Silver

4	A.S.B.	Æ 63.3 1.0	Similar to gold coins; <i>mazdisan bagī Shā</i> (?) on r. margin.	Roughly designed narrow fire-altar, with indication of bust in flame; on each side an attendant with spear or sceptre, turned towards altar; single line of beading; no legend.
5	I.M.	Æ 62 .9	Similar; legend obscure.	Similar; worn; traces of legend.
6	"	Æ 63.4 .85	Ditto; ditto.	Ditto; ditto; no legend.
7	A.S.B.	Æ 61.3 .95	Ditto; ditto.	Ditto; ditto; ditto.

No. 12. VARAHRĀN IV (KERMĀN SHĀH), 386-97 A. D.

Silver

1	I.M.	Æ 53.1 .93	King's bust r., with a curved plume at back of head-dress. Legend in very clear script, [<i>Va</i>]rahrān malkān ma[l]kā, 'V., king of kings.'	Fire-altar, with head of Ormazd r. in flame; attendants with spears, turned towards altar; no legend.
2	„	Æ 65 1.18	Bust of king r., but with a wing instead of curved plume at back of head-dress. Legend in front of face not read.	Similar, with head r.; in bad condition (apparently this coin must belong to V. IV).
3	„	Æ 65.1 .94	Bust and plume as on No. 1; <i>Varahrān</i> legible.	Similar, but no head in flame; legend illegible.

No. 13. YEZDEGIRD I (BAZAH-KĀR), 397-417 A. D.

1	I.M.	Æ 58.7 1.1	Bust of king r.; crown small, with globe above and crescent in front; long legend not read. (D. reads <i>mazdaian bagī rāmshetri Yazdekerti malkān malkā Airān.</i>)	Fire-altar with attendants turned towards it; <i>rāsti</i> , 'truth,' (Th.; 'good,' D.) on shaft; a 'taurine' symbol on each side of flame, and a plain crescent l. Legend, l. illegible; r. (?) <i>ain</i> , apparently the mint, 211 .
2	„	Æ 60.1 1.2	Generally similar, but face has an Indian look, and the legend before face only, not read.	Generally similar, but without the extra crescent; no legend (attribution doubtful).

No. 14. VARAHRĀN V (BAHRĀM GÖR), 417-38 A. D.

Silver

1	I.M.	Æ 61 1.13	Bust of king r.; two-pointed crown surmounted by crescent containing globe. Legend begins <i>Varahrān</i> (or <i>Valahlān</i>) <i>mal-kā</i> , rest not read.	Fire-altar with conical flame; head of Ormazd r., inserted in upper part of altar below flame; an attendant on each side with spear presenting arms to altar. Legend, l. <i>Varahrān</i> , imperfect; r. <i>Āi</i> (? = <i>Airān</i>), the mint (Th., Pl. VII, 8, same mint; L., Pl. VIII, 5, mint <i>Wah</i> ; B., Pl. XII).
2	"	Æ 65 1.25	Bust of king r.; head-dress a low crown surmounted by globe with wings. Legend, r. (?) <i>Lūr Varahrān</i> ; l. <i>kādī</i> , 'fortunate,' 'victorious Varahrān'; but meaning of <i>Lūr</i> not known.	Altar with three steps; no head of Ormazd; attendants with high caps presenting arms; no legend (Pl. XXIV, 8. This coin does not seem to agree with any published).

No. 15. YEZDEGIRD II, 438-57 A. D.

Silver

1	I.M.	Æ 61.4 1.2	Bust of king r.; three-pointed crown surmounted by crescent containing globe. Legend, <i>Rāmshatri</i> (?) <i>Izdakarti</i> . (According to D., the coins with legend <i>rāmshetri Yazdekerti</i> belong to Y. I. <i>Rāmshetri</i> = <i>rāmi kshatra</i> , 'prosperity of the empire.')	Two-stepped altar with conical flame; no Ormazd head; <i>rās</i> [tā], 'truth,' on shaft; attendant on each side presenting arms. Legend, l. seems to be <i>nūdah</i> , 'nineteen' (scil. regnal year); r. <i>Wah</i> or <i>Vah</i> , initialsyllable of a mint-name. (See B., Pl. XIII; L., Pl. VIII, 3, 4, erroneously ascribed to Y. I; Th., Pl. V, 4; but the legend there is <i>Kādī Izdakarti</i> .)

¹ As Rawlinson points out (*Seventh Or. Mon.*, p. 327), *Rām* was the guardian or tutor (précepteur) of Firōz, not of Hormazd III, as erroneously asserted by Th. (*Sassanians*, p. 67). This being so, it is natural to interpret these coins as issued by *Rām* on behalf of young Firōz, whose father's portrait is given the principal place. The coins assigned by L., Pl. IX, 1, to Hormazd III are Indo-Sassanian of Kābul, and will be described in the next section. No coins of Hormazd III are known.

¹ This curious coinage has been fully described and illustrated by Mr. Thomas in *Ind. Ant.*, vol. viii (1879), p. 269; *Num. Chron.*, 1881, pp. 116-128, Pl. VI, in connexion with the issues of Varahrān Chobīn. When the notice by the same author in *Prinsep's Essays*, ii. 116 was written, the legends had not been completely deciphered. Probably the specimens catalogued come from the hoard found in Kulū, where coins of Varahrān Chobīn were associated with the Bukharan imitations (*J. A. ut sup.*, p. 270).

POSTSCRIPT.

When writing the catalogue I overlooked two important papers by the late M. Drouin, namely, 'Histoire de l'Épigraphie Sassanide' (Aperçu sommaire; mémoire lu à la section Iranienne du Congrès des Orientalistes tenu à Paris en Septembre 1897); and 'Les Légendes des Monnaies Sassanides' (*Revue Archéologique*, 1898). The former gives a full bibliography of all publications on Sassanian matters, including the coins. The latter gives amended readings of all the coin legends. The more important corrections have been inserted in the proofs. M. Drouin describes Mordtmann's memoir in *Z. D. M. G.* for 1854 as 'un vaste travail d'ensemble qui a servi de base à tous les ouvrages postérieurs sur la matière'. Subsequent papers by Mordtmann appeared in 1857, 1865, 1879 and 1880. The memoir published in 1879 is a complete treatise on the numismatic history of the Arab Governors of Persia, while the posthumous memoir of 1880 brings the earlier essays up to date. According to M. Drouin, the essays of Mordtmann, combined with the plates of Bartholomaei, should be used still as the basis of all Sassanian studies. The only published catalogue of Sassanian coins is that by M. A. de Markoff (1889), describing about 500 coins of the Sassanian series in the cabinet of the *Institut des Langues Orientales* at St. Petersburg.

SECTION XIII

MEDIAEVAL INDO-SASSANIAN COINS, INCLUDING THOSE OF THE WHITE HUNS

INTRODUCTION

THE heterogeneous coins grouped together in this Section belong to widely separated localities, and probably extend over a period of six centuries, from about 500 to 1100 A. D. Few of them can be assigned with confidence to any particular kingdom or ruler; in fact, the only certain assignments to rulers of known date and place are those of the better *Ādi-varāha* coins to Bhojadeva I, king of Kanauj from about 840-90 A. D., and of certain White Hun pieces to Toramāṇa and Mihiragula, between 490 and 540 A. D. A morphological classification has, therefore, been found convenient, the bond of union being the common descent of the whole group from the Sassanian coinage described in the last section. Regarded in this light, these barbarous coins are interesting as examples of numismatic degradation.

The note in the catalogue gives full references concerning the coin of Vāhi-(*al.* Shāhi)-tigīn, who was probably a king of Multān about 500 A. D. The next coin catalogued certainly bears the name of King Napkī in Pahlavī. The five coins assigned to Napkī are all very much alike, but Nos. 2 and 3 replace the ordinary Pahlavī *Na* by a peculiar character. The provenance indicates that Napkī ruled at Kābul, and he may be assigned doubtfully to the fifth century. The note in the catalogue gives the necessary references. The 'solar type' coins with the legend *Tora* in bold Brahmī script may be attributed with confidence to the Toramāṇa, a White Hun or Ephthalite chief, who led his horde into India about 490 A. D., and was succeeded in his Indian dominions about 510 A. D. by his son Mihiragula or Mihirakula. The 'bull type' coins which bear the name of the latter certainly belong to the son of Toramāṇa, and often are restruck on the coins of that prince. Dr. Fleet has shown recently that Siālkōṭ in the Panjāb represents Sākala, the Indian capital of Mihiragula.¹ The White Huns

¹ 'Sagala, Sakala, the City of Milinda and Mihirakula' (*Actes du XIV^e Congrès Intern. des Or.*, t. I, 1906).

issued no coinage with types of their own, being content with barbarous imitations of the coins of the countries which they overran during the fifth and sixth centuries. Many of the White Hun coins are anonymous, but are distinguished by a peculiar mark, which Cunningham named the 'Ephthalite symbol' (see Pl. XXV, 6, 7).

The base silver coinage imitating the later issues of Firōz, the Sassanian king killed by the Ephthalites or White Huns in 488 A. D., probably was struck first by Toramāṇa at the close of the fifth century, but still more degraded copies continued to be issued much longer (Pl. XXV, 8-17).

This class of coins comes, so far as is recorded, chiefly from Rājputāna. The eastern or Magadha type (Pl. XXV, 10) preserves very faint recollections of either the Sassanian head or the fire-altar, although both may be traced on the better specimens. The pieces which bear the legend *Śrī Vi* or *Śrī Vigra* may be assigned with almost positive certainty to one or other of the kings of Magadha named Vighraha-pāla. The least barbarous specimens seem to have been issued by the first king of that name, about 900 A. D. The wholly corrupt copies may be as late as the time of Vighraha-pāla III, in the middle of the eleventh century.

The curious coinage known by the popular name Gadhaiyā, or Gadhiyā, of uncertain derivation, seems at first sight to have no intelligible device. But study of extensive series convinced numismatists long ago that the apparently meaningless marks are simply extreme degradations of the ancient Sassanian type (Pl. XXV, 11-17). A few of the later coins are inscribed (Pl. XXV, 15, 16), but I have not been able to make sense of the legend on the specimens catalogued, which seems to give a name beginning with *Kā*. Professor Rapson has shown (*J. R. A. S.*, 1900, p. 122) that certain coins of this kind, bearing the name of Chittarāja, were issued by a member of the Śilāhāra dynasty of the Northern Konkan on the Bombay coast between 1020 and 1060 A. D. The inscribed pieces now published may be of nearly the same date. Similar coins are sometimes found in Mewār (Webb, *Currencies of the Hindu States of Rājputāna*, pp. 4-6). The comparatively modern coin, No. 24, is interesting as proving the late survival of a dim recollection of the Sassanian prototype. Webb cites the 'Dhinglā paisā', which is still current in Rājputāna, as a still stronger illustration of the same fact.

The true assignment of the abundant *Ādi-varāha*, or 'primateval boar', coins was first effected by Professor Hultzsch, who showed that they were issued by the powerful king, Bhojadeva I, who ruled in Northern India, with his capital at Kanauj, from about 840 to 890 A. D.,

and took the title of *Ādi-varāha*, thus identifying himself with the 'boar incarnation' of Viṣṇu. Rude copies of this class of coin probably belong to the eleventh or twelfth century.

I am unable to say anything definite about the four coins grouped together as 'Unknown'. No. 1 (Pl. XXV, 19) is a variety of the Napki coins of Kābul. No. 3 (Pl. XXV, 20), exhibiting a Bactrian camel and fire-altar, may or may not be Indian; it does not seem to belong to the Sassanian coinage of Persia.

In addition to the references already given, the following publications may be consulted:—Cunningham, 'The Later Indo-Scythians' (*Num. Chron.*, 1894); V. A. Smith, 'History and Coinage of the Gupta Period' (*J. A. S. B.*, Part I, vol. lxiii, pp. 164–212); G. P. Taylor, 'On the Gadhaiyā Coins of Gujarāt' (*J. A. S. B.*, Part I, vol. lxxiii (1904), *Num. Suppl.*); and *I. C.*, secs. 103–9, with copious detailed references.

not believe that the word *Airān* occurs in the Br. legend. See Prinsep's *Essays*, ii. 110; *J. R. A. S.*, xii (1850), p. 344; *Reports*, v. 121; *Num. Chron.*, 1894, p. 291; *I. C.*, sec. 109; Drouin in *Revue Num.*, 1898, p. 139. The reading and meaning of the Br. legend still remain obscure, the characters being imperfectly formed, and varying much in different specimens. Compare *ante*, Section IV, Kushano-Sassanian coins.

¹ These specimens probably are all from Masson's collection made at Beghrām near Kābul, where the type, especially in copper, was of 'frequent occurrence'. Erroneously referred to Hormazd III by Longpérier (p. 59, Pl. IX, 1) with whom Rawlinson (*Seventh Great Or. Mon.*, p. 327) was inclined to agree; but neither author was aware of the Kābul provenance (Prinsep's *Essays*, vol. i, pp. 404, 410, Pl. XXXIII, 3), while both misread the legend. See Cunningham, *Num. Chron.*, 1894, Pl. X (XII), 3, p. 288; and compare the Kushano-Sassanian coins *ante* in section iv, and *post*, in this section, Unknown, No. 1.

SECTION XIV

THE HINDU KINGS OF OHIND

COMMONLY CALLED 'KINGS OF KĀBUL', FROM ABOUT

875 A. D. TO 1000 A. D.

INTRODUCTION

THE coins of the princes commonly called the 'Hindu Kings of Kābul', although long familiar to numismatists, and extremely common in Afghanistan, the Panjāb, and throughout Northern India, present a puzzle, or rather a series of puzzles, which nobody has succeeded in solving completely. They occur in three types, namely, the 'bull and horseman', 'elephant and lion', and 'lion and peacock'. The last named is known only from a single specimen in the British Museum (weight 30.3 grains, Bayley, No. 1), which bears the name श्री कमर, *Śrī Kamara*, over the lion, an heraldic-looking beast turned l., with its tail curved over its back. In form the lion on that coin closely resembles the animal depicted on the 'elephant and lion' pieces, which is turned r. These 'elephant and lion' coins belong to three reigns, namely, Śrī Padama (weight 33, Bayley, No. 2), Śrī Vakka-deva, and Śrī Sāmanta-deva, and occur in copper only. The Śrī Padama coin seems to be unique, whereas the coins of Vakka-deva and Sāmanta-deva, especially the latter, are common. The 'bull and horseman' type was issued in both silver and copper. The coins of this type bearing the name or title Sāmanta-deva are extremely abundant in both metals; those of Spalapati-deva, also in both metals, although less abundant, are fairly common¹; while those of Khudavayaka, in silver only, are rare; those of Bhīm-deva, likewise in silver only, are very rare; and a copper coin of Vakka-deva is believed to be unique.

The name which I read as *Vakka* has been read as *Varka* (Bayley), *Verka* (Thomas), *Veñka* (Cunningham), or *Vañka* (Rodgers)². In the labels on the A. S. B. coins Mr. Rodgers read Vakka as I do.

¹ A coin, either of Sāmanta-deva or Spalapati, when analysed, was found to contain 894.6 silver; the balance being copper, with a trace of gold (*Proc. A. S. B.*, 1889, p. 198).
1000

² The readings *Varka* or *Verka* cannot be supported. If the upper part of the conjunct character were the guttural *ṣ*, it should be a rectangle open to the r. The coins catalogued have not the *ε* which Cunningham detected on his specimens.

The name which seems to me to be *Khudavayaka* has been read as *Khvadavayaka* (Bayley and Rodgers), *Khuduvayaka* (Stein), and *Khamarayaka* (Cunningham)¹. Cunningham appears to be right in reading Spalapati rather than Syālapati or Syalapati.

The arrangement of these various kings in proper order is extremely difficult, and, in fact, impossible at present. Alberūnī (1031 A. D.) informs us that the last king of the ancient Turkī (or Kushān) dynasty of Kābul named Lagatūrmān was supplanted by his Brahman minister Kallar, who founded a 'Hindu Shahiya' dynasty, comprising Sāmand (= Sāmanta-deva), Kamalū (probably = Kamara), Bhīma (= Bhīm-deva), Jaipāl (Jayapāla), Ānandapāla, and Tarojanapāla (= Trilochana-pāla). The last named died in 412 A. H. (= April 1021-April 1022 A. D.), and his son Bhimapāla perished five years later. The Kashmīr chronicle tells of unsuccessful warfare waged by King Sāmaka-varman of Kashmīr (883-901 A. D.) against a Shāhi (= Shahiya) king named Lalliya of Udabhāṇḍapura (Ohind). The title of Shāhi (Shahiya, Śāhi) was taken over by the Brahman kings of the Panjāb from their Turkī predecessors, who held both Kābul and the Panjāb, and the date indicates that Lalliya must have been the earliest of the dynasty, who is called Kallar by Alberūnī. Thomas and Cunningham further identify Kallar with the Spalapati-deva of the coins, but there is no conclusive evidence to support this hypothesis. Cunningham seems to have sufficient reason for interpreting *Spalapati* as a Sanskritized form of a Persian title meaning 'military commander'. Sāmanta has the same signification in Sanskrit, and a doubt is thus suggested as to how far these names on the coins should be interpreted as being personal. Kamara and Bhimadeva of the rare coins (not included in this catalogue) evidently correspond respectively with Kamalū and Bhīm of Alberūnī; but Padama, Vakka, and Khuduvayaka cannot be fitted into his list with certainty. Although Sāmanta-deva obviously is the same as Sāmand, Spalapati remains unaccounted for; and, as remarked above, the words *Sāmanta* and *Spalapati* having the same meaning, may both refer to a single person. The matter is further complicated by the continued use of *Sāmanta* as a title on both Indian and Muhammadan coins long after the time of Alberūnī's Sāmand.

The rare coins of Aśata-pāla (Pl. XXVI, 6) seem to be the latest of the series, if, indeed, they are included rightly in it. The connexion of Aśata-pāla with the Hindu Shāhi dynasty is by no means clear, and it is evident that if he is to be assigned to it, his place must be found among the rulers with names ending in *pāla* about 1000 A. D., and not among the Sāmanta-deva series, which terminated about 950 A. D. It is not

¹ Cunningham's reading appears indefensible to me. It is better to read *Khu* than *Khv*.

unlikely, in spite of the slight difference in the spelling of the name, that the coins of Āśata-pāla should be ascribed to Āśaṭa, the chief of Chambā (Champā), who did homage to Kalāśa, king of Kashmīr in 1087-8 A. D. (*Rājāt.*, Bk. VII, 588, Stein's transl. vol. i, p. 315).

Although the 'Hindu Shahiya' dynasty is described by Alberūnī as having succeeded the old Turkī (Kushān) dynasty of Kābul, this statement should not be interpreted as meaning that Kābul was the capital of the Shahiyas. As a matter of fact, their capital was Ohind (Und, Waihind, Udabhāṇḍapura) on the Indus above Attock (Atak), while Kābul during their time was in the hands of the Musulmans, having been captured by Yā'qūb Lais in 257 A. H. (= Nov. 870-Nov. 871 A. D.). It is most improbable that the Shahiyas had anything to do with that city. While the Arabic author was quite correct in affirming that the Shahiyas were the successors of the Turkī dynasty of Kābul, he must not be understood to assert that the succession extended to the whole dominions of the older dynasty, which had included both Kābul and the Panjāb. When the change of dynasty occurred, Kābul probably was already in the hands of the foreign invader, and the new royal family had to be content with possessions lying outside the immediate range of the armies of Islām. At Ohind the Shahiya kings were in safety for a considerable time, until about 1013 A. D., when the last of them to enjoy power, Trilochana-pāla, was defeated decisively by Mahmūd of Ghaznī on the bank of the Taushī (Tosi) river on the southern frontier of Kashmīr. The members of the family enjoyed a high reputation and won the admiration of the Muhammadan savant in their conqueror's train, who generously observes, 'We must say that, in all their grandeur, they never slackened in the ardent desire of doing that which is good and right,—that they were men of noble sentiment and noble bearing.'

Certain coins of Sāmanta-deva and Spalapati exhibit on the horseman side figures 'written in numerals of a form intermediate between those of the mediaeval Indian mints and the modern Arabic forms . . . graduating into the latter'. They are read as 802, 812, 813, 814, 815, and 817 (Pl. XXVI), and I believe that they must be interpreted as dates expressed in the Śaka era, equivalent to years ranging from 880 to 895 A. D.¹ The fact that the same dates, if they are dates, occur on the coins of both Sāmanta-deva and Spalapati supports the suggestion that both those titles may have been used by one king, the Kallar of Alberūnī, and the Lalliya of the Kashmīr chronicle. Possibly the difficulty may be explained by the hypothesis that the coins with the Persian title were struck at mints situated in the territory west of

¹ Certain marks on some coins of Spalapati (catal. Nos. 2, 6) look like the old Indian 'numerical symbol' for 200.

the Indus, which formerly was included in the Persian empire, while those with the Sanskrit title were issued in the Panjāb. The evidence concerning the *provenance* of the coins is not sufficiently precise to enable this conjecture to be tested.

The principal references are:—*C. M. I.*, pp. 55–67, Pl. VII; Stein, *Zur Geschichte der Ghahis von Kabul* (Stuttgart, Kohlmann, 1893); transl. *Rājat.*, vol. ii, note J, with detailed references; Bayley, 'Remarks on certain Dates occurring on the Coins of the Hindu Kings of Kabul' (*Num. Chron.*, vol. ii, 3rd ser. (1882), p. 128, with two plates); Elliot, *History of India*, vol. ii, note A, p. 403; Thomas, *Prinsep's Essays*, vol. i, pp. 299–318, Pl. XXV; *Chronicles of the Pathān Kings of Delhi*, p. 57; and Sachau, transl. of Alberūnī's *Indica*, vol. ii, p. 13.

Among these works Stein's German pamphlet offers the best summary of the history. The writings of Bayley and Cunningham include much rather fanciful speculation, and at this time it is hardly necessary to observe that Bayley's ingenious attempt to interpret the supposed dates as referring to the Gupta era is quite untenable.

SECTION XV

THE MEDIAEVAL DYNASTIES OF CENTRAL INDIA

INTRODUCTION

THE three dynasties whose coinage is treated in this section were closely connected in place, time, and history. The most northerly kingdom, that of the Chandēllas, was equivalent roughly to the modern Bundēlkhand. Its capital was Mahoba, still existing as a town in the south of the Hamīrpur District, and the Rājās also held Kālanjar, Ajaigarh, and other strong places. The dynasty was founded about the end of the ninth or the beginning of the tenth century, and had attained considerable power at the time of the accession of Kirtivarma-deva, about 1060 A.D. The coinage begins with this prince, who copied the issues of Gāngeya-deva Vikramāditya of Western Chedi (about 1015-40 A.D.). The dynastic list, so far as it is relevant to this work, is as follows, with the known epigraphic dates A.D. :—

13. Kirtivarman, 1098.
14. Sallakshavarman (Hallakshana).
15. Jayavarman, 1117.
17. Madanavarman, 1129-62.
20. Paramardin, 1167-1201.
21. Trailokyavarman (or -malla), 1212-41.
22. Viravarman, 1261-86.

(Nos. 16, 18, 19 in the genealogy did not reign.)

The Kalachuri or Haihaya dynasty of Western Chedi, which had its capital at Tripuri (Tewar) near Jabalpur (Jubbulpore, Central Provinces), to the south of the Narbadā, was nearly synchronous with the Chandēllas, its history extending from 900 to 1200 A.D. in round numbers. Out of the fifteen names in the genealogy, one alone, that of Gāngeya-deva Vikramāditya, who reigned from about 1015 to 1040 A.D., concerns the numismatist, for no coins are known which can be attributed to any of the other Rājās. The coins of Gāngeya are fairly common in the eastern districts of the United Provinces, and

there is reason to believe that in 1019 A.D. he had extended his authority even to Champāran in Tīrhūt. He initiated the type of coinage which was copied by the Chandēlla and other dynasties.

The kingdom of Eastern Chedi or Dāhāla, the valley of the Mahānadi, was roughly equivalent to the modern Chhattisgarh Division of the Central Provinces, with Ratnapura (Ratanpur) as its capital. The Rājās, like those of Western Chedi, belonged to the Kalachuri or Haihaya clan of Kshatriyas or Rājapūts. Their history falls within the limits of 1000 and 1200 A.D. The relevant portion of the dynastic list, with the known epigraphic dates, is as follows :—

3. Ratnarāja I.
4. Prithvideva I.
5. Jājalla I, 1114.
6. Ratnadeva II.
7. Prithvideva II, 1141-58.
8. Jājalla II, 1167.
9. Ratnadeva III, 1181.

The repetition of names causes difficulty in assigning the coins. Those catalogued probably belong to Nos. 7-9, but they might be assigned to the earlier homonymous Rājās.

The dynastic lists referred to for all three dynasties are those recently prepared from inscriptions by Professor Kielhorn (*Ep. Ind.*, vol. viii, App. I), which supersede all earlier lists.

The design of Gāṅgeya-deva's model coinage is very simple. The obverse is wholly occupied by the Rājā's name in bold characters, not differing very much from modern Nāgarī. The reverse type is a rudely executed figure of a goddess seated cross-legged. The Chandēlla gold coins are exactly the same in appearance, the names only being changed. The cabinets catalogued do not include any specimen of the rare Chandēlla copper coinage, which substitutes Hanumān for the goddess. The obverse of the Eastern Chedi or Ratnapura coinage resembles that of Gāṅgeya-deva and the Chandēllas, with the necessary changes of names, but on the reverse an indistinct figure of a rampant lion to the right takes the place of the goddess. The large gold coins were known by the name of *dramma*, and are struck to the Greek drachma standard. The smaller sizes are fractional parts of a *dramma*. Two examples of coins of Gāṅgeya-deva weighing 7 grains each ($\frac{1}{8}$ th *dramma*) are known; and No. 9 in this catalogue weighs only 5.6 grains, although in fair condition.¹ The copper coins follow the same scale of weights, as also do the rare coins supposed to be silver.

¹ Various kinds of *drammas* are mentioned in the great Siyādoni inscription of the tenth century A.D. (*Ep. Ind.*, i. 168). The late survival of the Greek name and weight standard is interesting.

But I am not certain that any of these dynasties really struck a silver coinage. Much of their gold is so largely alloyed with silver as to be distinguishable with difficulty from coins intended to be of that metal, and it is possible that all the pieces which seem at first sight to be silver were regarded officially as being gold.

See *C.M.I.*, pp. 67-80, Pl. VIII; and for the coins of the Chandēllas and Gāṅgeya-deva, *J. A. S. B.*, vol. lxvi, Part I (1897), p. 306.

² The specimens catalogued of the E. Chedi dynasty mostly come from the hoard of fifty-six coins found in 1892 somewhere in the Feudatory State of Sarangarh, Chhattisgarh, which comprised 26 base coins of Jājalla-deva, 9 large and 17 small; 29 small base coins of Ratna-deva; and one large coin in good gold of Prithvi-deva (*Proc. A. S. B.*, 1893, p. 92). Examples of the coinage of all the three Rājās have been found also at Dūdhī in the south of the Mirzāpur District, U. P., and some of the specimens may come from that find.

SECTION XVI

THE MEDIAEVAL DYNASTIES OF NORTHERN INDIA

INTRODUCTION

THE group of Rājput dynasties dealt with in this section occupied various parts of Upper India during the period extending from about the middle of the tenth century to the Muhammadan conquest in the twelfth and thirteenth centuries. The intricate history of these dynasties, for which considerable materials exist, remains to be written; but the observations in this place must be restricted to those indispensable for a student of the coins.

The earliest dynasty of the group is that established by the Tomara Rājās of Ajmīr and Delhi, founded, according to tradition, in the eighth century, but not authentically known until the tenth. Cunningham gives the following list of Rājās and approximate dates¹:—

1. Sallakshapāla-deva	978-1003 A.D.
2. Ajayapāla-deva	1003-1019 "
3. Kumārapāla-deva	1019-1049 "
4. Anangapāla-deva	1049-1079 "
5. Mahīpāla	1103-1128 "

The coinage of Ajaya-pāla, No. 2, although common in Rājputāna, is not represented in the cabinets catalogued, but specimens of the coins of the other four Rājās are included. The Tomara princes all followed one or other of two numismatic models—either the coinage initiated by Gāṅgeya-deva of Chedi (*ante*, p. 251), or the 'bull and horseman' type of the kings of Ohind (*ante*, p. 243). Cunningham has shown that Mahīpāla, No. 5, adopted both types of coinage, and that his example was followed by the Musalman conqueror, Muhammad bin Sām, or Shihāb-ud-dīn, in the coins which he struck in imitation of Hindu patterns. The known coins of Kumāra-pāla, which are scarce, occur in gold only, more or less base, and of the Gāṅgeya-deva type. Sallakshapāla and Ananga-pāla seem to have issued nothing but 'bull

¹ The dates are open to doubt, and the history of the dynasty generally requires discussion. I am not certain that the Rājās held Kanauj.

and horseman' coins. The gold coins of Kumāra-pāla, like the prototype issues of Gāṅgeya-deva, are *drammas* or drachmae. The 'bull and horseman' coins appear to be composed usually of billon, a mixture of silver and copper, varying so much in composition as to range from fairly good silver to nearly pure copper. Some of the pieces may be classed as silver. They are mentioned by Muhammadan historians as '*Dilli-wāls*' or 'Delhi coinage', but their Hindu name is not known. The weight of the 'bull and horseman' series seems to have been intended to harmonize with that of the ancient *purāṇa* or 'punch-marked' coin of 32 *ratīs*, about 58 grains.

The epigraphic material for the history of the second dynasty, the Gaharwār or Rāṭhōr house of Kanauj, is extensive. Here it will suffice to note that Chandra-deva acquired the sovereignty over Kanauj in the latter part of the eleventh century; and that his grandson, Govinda-chandra, whose known dates range from 1114 to 1154 A. D., became temporarily the paramount sovereign of a large part of northern India. The gold *dramma* coins of this king, often in extremely base metal, are abundant. Eight hundred of them were found in 1887 near Nānpārā in the Bahraich District, Oudh, during the construction of the Bengal and North-Western Railway. His copper coinage, of the same type, is scarce.

Madana-pāla, father of Govinda-chandra, issued only 'bull and horseman' coins, most of which seem to be billon, although No. 1 may be classed as silver. Professor Kielhorn (*Ep. Ind.*, viii, App. I) gives the dynastic list and known epigraphic dates as follows:—

1. Yaśovigraha.	
2. Mahichandra.	
3. Chandradeva	1097 A. D.
4. Madanapāla	1104-9 A. D.
5. Govindachandra	1114-54 A. D.
6. Vijayachandra	1168, 1169 A. D.
7. Jayachandra	1170-87 A. D.

The third dynasty, that of the Chaubāns (Chāhamānas) of Ajmīr, Delhi, and Śākambharī (Sāmbhar), came to an end with the celebrated Prithvī Rājā, or Pirthirāj, who had vanquished the Chandēlla Rājā Paramardi (Parmāl) in 1182 A. D., and was himself defeated and executed by Shihāb-ud-dīn in 1193. The coins of Prithvī Rājā and his father Someśvara are all of the 'bull and horseman' type. A full dynastic and genealogical list of the family will be found in Professor Kielhorn's work above cited.

The fourth dynasty had its principal seat at Narwar, not far from Gwalior. The two princes whose coins are catalogued, Malaya-varman

and Chāhaḍa-deva, ruled from about 1220 to 1260 A.D. The latter, who is described by a Muhammadan historian as 'the greatest of the chiefs of Hindustan', was defeated by Ulūgh Khān (Balban) in 1251 A.D. The coins of both Malaya-varman and Chāhaḍa-deva are of the 'bull and horseman' type, and some are dated.

A few coins of the same type cannot be assigned definitely to any particular ruler or locality. The legends on No. 1 of Pipala are perfectly clear, but the identity of the Rājā so named is uncertain. He may be the Pipala-deva, a chief at Māchārī in the Alwar State, Rājputāna, who seems to be mentioned in line 10 of an inscription (*Reports*, vi. 79, Pl. XI). The reverse legend is *Kutāmāna Śrī Sāmanta-deva*, in which the meaning of the first word is unknown. The title *Sāmanta-deva* recurs on most of the 'bull and horseman' coins, having been borrowed with the device from the Ohind series. Cunningham had three specimens of Pipala.

The name read by Thomas and Cunningham as *Killi* possibly may be *Kirti*. The name doubtfully read as *Pithi* may be a form of *Prithvī*. The coin with *Śrī Hamīraḥ* on the obv. (horseman) side, and a strange legend on the rev. (bull) side seems to be the same as *C. M. I.*, No. 22, p. 88, on which Cunningham read doubtfully *mau + Śrī Uvāme*, which cannot be right (Pl. XXVI, 23). He considered his specimen to be unique. The debased little coin with the legend *सोनदेव*, *Sona-deva*, and mere indications of the horseman, evidently is of late date. The last coin catalogued, which has a peculiar horseman on one side and the other side wholly occupied by large, late characters, puzzles me. The rude copper coins with Śiva and bull on the obverse, and the monogram reading *Kota*, or another read as *Śruta*, *Ghuta*, or *Ata*, or sometimes a trident and other marks on the reverse, are common in the Delhi bazaar and in the Eastern Panjāb. They are copied obviously from the money of Vāsudeva Kushān, and some of the reverse devices may be an echo of the Sassanian type. Nobody can determine their exact date or who struck them. Cunningham believed that they formed 'the common copper currency of the Panjāb and Rājputāna between A. D. 500 and 800'.

The best account of the coins treated in this Section is that in *C. M. I.*, pp. 48, 52, 80-93, Pl. VI, IX. The earlier discussion of the 'bull and horseman' series by Thomas in *Chronicles of the Pathān Kings*, pp. 58-75, must be used with caution, as it contains some serious errors, of which the principal is the assignment of Sallakshana-pāla and Madanapāla to the Chandēlla dynasty. This mistake, repeated in *Proc. A. S. B.*, p. 127, was corrected *ibid.*, 1900, p. 205.

SECTION XVII

THE HINDU COINAGE OF KASHMĪR

INTRODUCTION

THE ample discussion and illustration of the ancient Kashmīr coinage by Sir Alexander Cunningham (*C. M. I.*, pp. 25-46, Pl. III-V) and Dr. Stein (*Num. Chron.*, 1899, with a plate; transl. *Rājat.*, vol. ii, note H) render unnecessary any lengthy dissertation in this place. From the accession of Śankaravarman in 883 A.D., the chronology is clear and certain, but the dates of the few earlier kings whose coins are represented in the following catalogue are quite unsettled. Kalhaṇa's chronicle, the *Rājataranginī*, records that an ancient king named Narendrāditya also bore the name of Khinkhila. The little coin with the legend *Khingī* may or may not be his, and, if it is, the materials for determining its date with any approach to exactness do not exist.

The coins inscribed with the name of Toramāṇa, either in full or in an abbreviated form, seem to date from the sixth century, that is to say, the earliest of them may be ascribed to that period. But 'Toramāṇas' continued in circulation until the fifteenth century, and it is clear, as Dr. Stein observes, that such pieces were struck, 'not only by the king who bore this name, but by a succession of rulers after him.' I cannot pretend to distinguish the imitations from the originals. Nor is it at all certain who Toramāṇa was. Dr. Stein probably is right in believing that he is to be identified with the prince so called, who 'put in circulation coins struck in his own name' during the lifetime of his brother, king Hiranya. But we do not know when king Hiranya lived. In Section XIII, *ante*, coins of a Toramāṇa have been described which undoubtedly must be attributed to the White Hun chief, the son of Mihirakula. It is an open question whether or not the Toramāṇa of the Kashmīr chronicle is identical with that chief.

Dr. Stein's identification of Pratāpa of the coins with Pratāpāditya II, or Durlabhaka, who was reigning in 700 A.D., is highly probable, if not quite certain.

The fixation in time and place of the king Yaśovarman, who struck rude coins in the style of the early Kashmīr rulers, has long been a matter

of dispute, and the problem has not been solved yet. The name does not occur in the Kashmir lists. The correct reading appears to be *Yaśovarman*, not *Yaśodharma*; and it is, therefore, unlikely that Dr. Hoernle's conjecture can be correct that the coins were struck by Yaśodharman, *alias* Vishnuvardhana, who defeated Mihirakula in or about 528 A.D. The coins are so barbarous that it is impossible to fix their date by their style. They are found, I think, chiefly in the Panjāb—one was deposited in the Mānikyala *stūpa*—and there are difficulties consequently, in identifying the prince who issued the coins with Yaśovarman of Kanauj whom Lalitāditya of Kanauj defeated between 730 and 740 A.D.; but no better specific suggestion is available. I am inclined to believe that the coins were struck by an unrecorded Rājā either in the Panjāb or Kashmir during the sixth or seventh century.

The similar, but, perhaps, still ruder coins with the legend *Vinayāditya* are assigned rightly to Jayāpīḍa of Kashmir (about 750–80 A.D.), who assumed that title. The similar coins on which Cunningham read the legend *Śrī Vighraha* are of the same rude type, and of approximately the same period, but there is no record of any Kashmir prince of that name. Dr. Stein reads the legend as *Viśramādeva*, but on the specimens which I have seen Cunningham's reading seems preferable.

From the time of Śankaravarman (883–902 A.D.) onwards, the chronology being certain, no difficulty occurs in the attribution of the coins. The series catalogued is very poor and incomplete, most of the rarer kinds being absent. The type of all the coins without exception¹ is derived from the standard Kushān type, with the standing king on the obverse and the seated goddess on the reverse. The coins of Pratāpāditya, Vinayāditya, Yaśovarman, and Vighraha present the type in an extremely debased, almost unrecognizable form, executed boldly in high relief, and the material often is an alloy intended apparently to pass as base gold. But some of the coins seem to be honest copper or bronze. The coins of this class in the catalogue range in weight from 83.8 to 123.5 grains, and their mean diameter is about .85 inch. The long series beginning with Śankaravarman presents the same Kushān type in a different form, which is characteristic of Kashmir currency. The earliest examples of this form are found in the coinage of Toramāṇa, some specimens of which exhibit the king sacrificing at an altar after the Kushān manner, clad in a peculiar skirt and frilled drawers. This curious costume assumes a very grotesque appearance on the later more debased coins, and the seated goddess of the reverse suffers equal degradation. No Kashmir coins possess any pretence to beauty—the whole coinage is utterly barbarous. The weight of the Toramāṇa coins

¹ The *Khingī* coin may not belong to Kashmir.

catalogued in this section ranges from 83.8 to 111.5 grains. Most of them weigh about 100 grains, a little more or less. The coins from the time of Śankaravarman onwards are lighter. Those catalogued range in weight (excluding the exceptional No. 5 of Kalaśa) from 71.5 to 97.5 grains. A full discussion of the weight standard of the Kashmīr currency will be found in Dr. Stein's essay, already cited, to which the reader is referred. When Cunningham wrote, an accurate translation of the Kashmīr chronicle was not available, so that some of his remarks need correction in the light of Dr. Stein's researches. But, notwithstanding this reservation, Cunningham's work still must be studied by any person who takes an interest in the rather unattractive Kashmīr coinage.

¹ Cunningham erroneously distinguishes Jayasimha I (1127-30) from Jayasimha II (1132-55). In reality there was only one Jayasimha, who reigned for twenty-seven years. His history is related at great length in *Rājataranginī*, Bk. viii, and in Stein's *Introduction*; see also Stein, vol. ii, p. 314, note.

² Jāga-deva is not included in Stein's lists because the *Rājat.* was completed in 1149-50 A. D.

SECTION XVIII

THE COINS OF THE MAHĀRĀJĀS OF KĀNGRĀ

INTRODUCTION

THE great fort at Kāngrā (N. lat. 32° 5', E. long. 76° 18') in early times was the stronghold of the kingdom of Jālandhara or Trigarta. The family of the Rājās claimed the honour of very high antiquity, but their coinage is comparatively modern. It begins with coins bearing the legend *Sāmanta deva*, directly imitated from the 'bull and horseman' coins of the kings of Ohind (*ante*, Sect. xiv). It is impossible to determine the personal name or the exact date of the Rājā of Kāngrā who struck the *Sāmanta deva* pieces; but, so far as may be judged from their appearance, and their close resemblance to the coins known to belong to the fourteenth century, they cannot be assigned to a period much anterior to 1300 A. D. The earliest coins assignable to a named Rājā of Kāngrā are those of Pithama (Pṛithivī) chandra deva, who reigned from about 1315 to 1330 A. D. The series closes with Triloka chandra deva in the beginning of the seventeenth century, and thus extends over a period of three hundred years in round numbers. During this period, according to Cunningham's list (*C. M. I.*, p. 104), eighteen Rājās reigned, and fifteen of them are known to have struck coins. In the following catalogue the coinage of twelve of those fifteen princes is represented.

The coins from first to last vary little, all being shabby little pieces of copper or bronze, rudely executed and devoid of all pretence to artistic merit. The type is a degraded imitation of the 'bull and horseman' device of the Ohind coins (*ante*, Sect. xiv), the bull being sometimes omitted, and the outline of the horseman often barely recognizable. The diameter ordinarily varies between .5 and .6 inch, with an average of about .55. The coin of Dharma chandra deva, diameter .41, is exceptionally small. The weight usually is a little above or below 50 grains. Excluding the anomalous Dharma chandra deva coin with a weight of 22.5 grains, and a few worn coins weighing

between 30 and 40 grains each, the weight of the specimens catalogued ranges from 40 to 63.3 grains.

The chief interest of this merely local coinage is derived from its remarkable uniformity and persistence of type. The coins are described with sufficient fullness by Cunningham (*C. M. I.*, pp. 101-8, Pl. XI), but Rodgers has pointed out that the reading of the name *Kapa* is erroneous. The coins attributed to the imaginary Kapa appear to belong to Rūpa chandra deva, the contemporary of Firoz Tughlak in the fourteenth century. Dr. Vogel has been engaged recently in investigating the antiquities of the Kāngrā Valley, and when his researches are published the local history will be known more fully than it is at present. He now announces (1906) that 'the historical fort and the numerous temples of Kāngrā Koṭ are completely destroyed' by the earthquake of 1905.

SECTION XIX

NEPĀL AND CHAMPĀRAN

INTRODUCTION

THE modern kingdom of Nepāl, a considerable territory extending east and west for a distance of about five hundred miles between the Indian plains and the Himalayan snowy range, with a breadth of about one hundred and thirty miles, was formed by the Gurkha or Gōrkhālī conquests in the eighteenth century, as modified by subsequent transactions with the Government of India. But, strictly speaking, the name Nepāl applies only to the valley surrounding the capital, and in ancient documents it must be so interpreted. The other territories now included in the kingdom were ruled formerly by various independent Rājās. The Valley of Nepāl is a tract of comparatively level ground elevated about 4,500 feet above the sea, with an average length from east to west of about twenty miles, and an average breadth from north to south of about fifteen miles. This small region contains no less than three considerable towns or cities, which have been the capitals of principalities, namely, Kāthmāṇḍū¹ (lat. 27° 42' N., long. 85° 36' E.) or Kāntipur, the present capital; Pātan or Lalitāpur, two miles to the south-east of Kāthmāṇḍū, and Bhatgaon or Bhātgaon, nine miles to the east of that city. About sixty smaller towns are scattered over the valley.

Nepāl, in the limited sense defined above, was included in the empire of Aśoka, but in the fourth century A. D. was outside of the dominions of Samudra gupta. About 637 A. D. it seems to have been conquered by Harsha vardhana, Lord Paramount of Northern India, whose era, dating from 606-7 A. D., was used in the country in 640 and 645 A. D. (*Ind. Ant.*, xix, 40; *contra*, Ettinghausen, *Harṣa-Vardhana*, p. 47, Louvain, 1906). But his suzerainty over the valley lasted only a few years, and at the time of his death in 648 A. D. Nepāl was a dependency of Tu-fan or Tibet.

Its numismatic history begins in the sixth century with a series of large copper coins bearing the names of Mānāṅka, Gunāṅka, Vaiśra-

¹ For the spelling see Bendall, *Journey*, p. 3, note. The text follows Wright's *History of Nepāl*, cited as W.

vana, Amśuvarman, Jishnugupta, and Paśupati. Inscriptions and the testimony of the Chinese pilgrim Hiuen Tsang prove that Amśuvarman was reigning between 640 and 650, and that he was succeeded by Jishnugupta. The dates of the coins inscribed with the names of Mānāṅka, Guṇāṅka, Vaiśravana, and Paśupati cannot be determined with equal precision, but those of Mānāṅka may be assigned to the sixth, and the latest, those of Paśupati, to the eighth century. Vaiśravana and Paśupati probably are the names of deities, not of kings.

A Rājā named Rāghava deva introduced a new era, the Nepālī or Newār Samvat, the first year of which began on October 20, 879 A.D. Dates recorded in this era are converted roughly into dates A.D. by the addition of 880. M. Lévi believes that the establishment of the Nepālī era was the official declaration of the independence of Nepāl, which then severed its political dependence on Tibet. A wide gap separates the latest ancient coins, those bearing the name of Paśupati, from the earliest coins of the Malla kings at the beginning of the seventeenth century, when the country was divided into the three principalities of Bhatgaon, Kāthmāṇḍū, and Pātan. The first recorded coin date seems to be 751 N.S. = 1631 A.D. of Siddhi narasiṃha of Pātan; but the catalogue includes an undated coin of Lakshmi narasiṃha of Kāthmāṇḍū, who reigned from 1595 to 1639 A.D. According to the native chronicle the first silver coinage of Nepāl was struck in the sixteenth century by Rājā Mahindra Malla (No. 13) of Kāthmāṇḍū, who visited Delhi, and obtained special permission from the Emperor, presumably Akbar (W., p. 207). The coins of the Malla Rājās of the three principalities are dated, if dated at all, in the Nepālī or Newār era, and the series extends up to the Gōrkhālī conquest in 1768 A.D.

In that year Prithvī nārāyaṇa sāk, who had become Rājā of Gorkhā, forty miles to the west of Kāthmāṇḍū in 1742 (W., p. 290), conquered the Valley of Nepāl, and established the dynasty which still subsists, although overshadowed by the hereditary ministers, who are the real rulers of the country. The Gōrkhālī coins are dated in the Śaka era, which may be converted roughly into the Christian era by the addition of 78.

The ancient copper coinage of Amśuvarman, &c. is closely allied to the Yaudheya coinage, and, like it, is descended from the Kushān. The heaviest of the specimens catalogued weighs 208.4 grains, and may have been intended for a $1\frac{1}{2}$ *pana* piece of about 219 grains. The Malla coinage, in silver only, seems to have been struck to the Delhi rupee standard of 175 grains. Some specimens exhibit imperfect attempts to copy the Persian or Arabic legends of the Mughal coinage. All the known coins are broad thin pieces about an inch in diameter, generally weighing about 85 grains. The heaviest recorded weight for these half-

rupees is 87.5 grains for coins of Siddhi narasimha of Pātan and Rāṇajita malla of Bhatgaon. The types, excepting a few pieces which attempt to copy the Mughal coinage, are local in character.

The Gōrkhālī coinage bears a general resemblance to that of the Malla Rājās, and is struck to the same standard, but includes examples of whole rupees, as well as of fractions smaller than the half. Gīrvān yuddha vikrama and Surendra vikrama issued gold coins similar to the silver in weight and design; and the last-named prince also emitted an extensive copper coinage. But the Nepalese prefer the so-called 'dumpy pice', rough lumps of copper manufactured by private persons, which are largely used to this day, not only in Nepāl, but in the adjoining British districts.

For the ancient copper coinage, *C. A. I.*, pp. 112-18, Pl. XIII, is the best authority. The Malla and Gōrkhālī coinage has not been described previously in detail, and, except a few specimens in Marsden's *Numismata Orientalia*, could be studied hitherto only in Mr. Rodgers' rough lists. The collection now catalogued, the origin of which I do not know, is sufficiently comprehensive to give a good notion of the coinage of Nepāl from 1600 A. D. to the present time.

Materials for the history of the country will be found in sundry articles in *Ind. Ant.*, vols. ix, xiii, xiv; D. Wright, *History of Nepāl* (Cambridge Univ. Press, 1877, cited as W.); Prof. C. Bendall, *A Journey in Nepāl and Northern India* (Cambridge Univ. Press, 1886; esp. Table II); 'The History of Nepāl and Surrounding Kingdoms (1000-1600 A. D.), compiled chiefly from MSS. lately discovered' (*J. A. S. B.*, Part I, 1903); and Prof. Sylvain Lévi, *Le Népal, Étude historique d'un Royaume hindou* (3 vols., Paris, 1905). The last-named work embodies the results attained by all earlier inquirers. I have seen only the first volume.

The proper attribution of the coins of Madana simha deva of Champāran was discovered by the late Prof. C. Bendall, who gives the following list of the

'Dynasty of Gorakhpur-Champāran (Western Tirhūt)

1. Prithvi-simha deva, A. D. 1434-5.
2. Śaktisimha.
3. Madana (Simha deva), 1453-4, 1457-8' (*J. A. S. B.*, Part I, 1903, *ut sup.*, pp. 20, 31 of reprint).

The coins, which are common in Gorakhpur, also occur in the Panjāb (Rodgers, *Cat. I. M.*, Part III, pp. 100, 125; *Cat. Lahore Mus.*, Part IV, p. 12 (20 specimens), with erroneous readings; V. A. Smith, *J. A. S. B.*, Part I, 1897, p. 310; the reading *praṇaya* gives better sense than *praṇava*).

Date below 789 (N. S. = 1769 A. D. Pl. XXVIII, 4). ²
---	------	----------------	---	---

¹ The honorific prefix *Śrī* is not translated. 'Pratāpa malla inonde de sa prose et de ses vers l'étendue de ses domaines' (Lévi, vol. i, p. 216). See also W., p. 215.

² For the story see W., pp. 219, 220. 'The inscription on Chakravartendra's coin, devised by the Svāmī, consists of a triangular *Bānāstra* (bow and arrow), *Pās* (a noose), *Ankus* (the iron hook for driving an elephant), *Kamāl* (a lotus), *Chāmar* (a yak's tail), and Sambat 789. This device caused his death. Note.—A bow and arrow are ominous of death, but, nevertheless, the water in which such a coin is dipped possesses the quality of causing a speedy delivery in child-bed. These coins, which are very rare, are still used for this purpose.'

SECTION XX

THE NORTH-EASTERN FRONTIER KINGDOMS; ASSAM AND MINOR STATES

INTRODUCTION

It is unnecessary to discuss in this place the meagre data available for the reconstruction of the ancient history of the kingdom of Kāmarūpa, which corresponded roughly with the modern province of Assam (Āsām). The early rulers of the country have not left any numismatic memorials. The modern history of Assam begins with the invasion of the Āhōms, who are 'the descendants of those Shāns who, under the leadership of Chukāphā, crossed the Patkoi [mountains] about 1228 A. D. (or just about the time when Kublai Khān was establishing his power in China) and entered the upper portion of the province, to which they have given their name. The Āhōms were not apparently a very large tribe, and they consequently took some time to consolidate their power in Upper Assam. They were engaged for several hundred years in conflict with the Chutiās and Kachāris, and it was not till 1540 A. D. that they finally overthrew the latter, and established their rule as far as the Kallang [river near Gauhātī]. . . . Subsequently the Koch kingdom [further west] was divided into two parts, and as its power declined that of the Āhōms increased, and the Rājās of Jaintia, Dimarua, and others, who had formerly been feudatories of Biśwa Singh, acknowledged the suzerainty of the Āhōms. The Musālmāns on several occasions invaded their country, but never succeeded in permanently annexing it. . . . In 1663 A. D. Mīr Jumlā invaded the country with a large army, and after some fighting took the capital. [But difficulties ensued, which made] him 'glad to patch up a peace. . . . The Āhōms then took Gauhātī and . . . defeated another Musālmān army. The Āhōms were then [about 1670 A. D.] at the height of their power; all the minor rulers of the country acknowledged their supremacy. . . . But even then the decline was at hand. They had for some time hankered after Hinduism, and the Rājās had for years been in the habit of taking a Hindu as well as a Shān name. Eventually Rudra Singh, alias Chukrunghā, who became king in 1695, [and is regarded by many as the greatest of all the

Āhōm kings] resolved to make a public profession of Hinduism, . . . but died in 1714 while still unconverted. His son, Sib Singh [Śiva sinha], succeeded him, and became a disciple of Kṛishṇa-rām [the Śākta Gosain of Nadiā]. In his reign the seeds of future dissensions were sown by the persecution of the Moamaras, while the pride of race, which had hitherto sustained the Āhōms, began to disappear. . . . Patriotic feeling soon disappeared, and the country was filled with dissensions. . . . Captain Welsh was deputed by Lord Cornwallis to help the King Gaurī-nāth Singh, who was then being besieged at Gauhātī, and with his aid he was once more freed from his enemies. At this juncture Sir John Shore succeeded to the Governor-Generalship, and one of his first acts was to recall Welsh (1794 A.D.), after whose departure the country was given again over to anarchy. The aid of the Burmese was then invoked (1816 A.D.), and the latter remained in the country until 1824, when they were driven out by our troops, and the country was annexed' [early in 1825].¹ An Āhōm Rājā however continued to exist for some time longer, and in 1844 the last of the royal line did good service by arranging for the publication of a history of his country, which had always been careful to preserve its annals.

The foregoing summary of the history will serve, with little additional explanation, to render intelligible the fine series of coins now catalogued. A list of the Rājās will be found in Prinsep's *Useful Tables*, copied into Duff's *Chronology of India*, and corrected by Gait (*Report on the Progress of Historical Research in Assam*, Shillong, Secretariat Printing Office, 1897). The blue-book last named gives complete references to all publications on the subject of Assamese history, which has recently been treated in detail by Mr. Gait in his work entitled *A History of Assam* (Calcutta, Thacker Spink, 1905), which also deals with the neighbouring minor states.

The initial syllable of the Shān names of the kings is generally given as *Chu*, but Bābū Golāp Chandra Baruā, the Āhōm translator, transliterates it as Śu (ꯀ) in his account of the Āhōm coins (*J. A. S. B.*, Part I, 1895, p. 286, Pl. XXVII). The six coins described by the Bābū and Mr. Gait are all included in this catalogue, with the addition of two specimens of Śupātphā or Gadādhara sinha from the Indian Museum cabinet. The earlier Rājās seem to have issued coins inscribed with legends in the Āhōm language and character only, but Rājā Pramatha sinha, alias Śuneñphā, used both Āhōm and Sanskrit. The catalogue includes one of his coins with Āhōm and eight with Sanskrit legends. The Āhōm language, which is now almost extinct, is a member of the group of Northern Shān (Shām or Tai) languages, and is written in

¹ Grierson (quoting Gait), *Linguistic Survey of India*, vol. ii, p. 61, with additions in brackets.

a peculiar character, ultimately derived from the Pāli. In the work above cited Dr. Grierson has supplied ample materials for the study of the Āhōm language and alphabet, but his vocabulary fails to include the words in the coin legends. The readings of those legends in the catalogue are given on the authority of Bābū Golāp Chandra Baruā.

The coins of the dynasty are all octagonal, except a few of the smallest, which are circular or oval,¹ and certain square pieces struck by Queen Pramathēśvarī and Rājeśvara śimha, which bear Persian legends. Rājeśvara śimha also struck coins of the usual octagonal shape with Persian legends. These Assamese coins with Persian legends, although struck in considerable numbers, have become known only recently.² The larger pieces are of thick, solid fabric, and are said to be of good metal. Most of them are in silver, but some are gold. The legends are well executed, and those in the Sanskrit language usually are inscribed in the Bengālī script. They are intensely devotional in expression, the commonest formula describing the Rājā as a bee feeding on the nectar from the feet of Śiva or some other deity of the Hindu pantheon. Poetical words, such as *aravinda* for 'lotus' and *makaranda* for 'nectar', are sometimes substituted for the more common equivalents *kamala* and *amṛita*. The Āhōm legends of Śupātpā or Gadādhara śimha express devotion to the tribal god Leṇḍan, who was identified with the Hindu Indra or Purandara. The legend on the coin of Śukleṇmuṇi represents the Rājā as praying to the Almighty (*tārā*).

The coins, the heaviest of which weighs 176.7 grains, appear to be intended for rupees of about 175 grains each, or for fractions of a rupee. The smallest is a tiny silver piece of Gaurinātha, .22 inch in diameter, and weighing only 4.2 grains; but small as it is, the Rājā's name is distinctly legible (Pl. XXIX, 8). The gold coins are struck to the same weight standard as those in silver. Most of the coins are dated in the Śāka era, and some show the regnal year in addition.

The coinage of the minor states may be dismissed briefly. The small principality of Jayantāpura, now known as the Jaintia Parganas to the north-east of the Sylhet District, was annexed in 1835 owing to the abduction of four British subjects for use as human sacrifices to Kālī. Its rare coinage is represented by four specimens in the Indian Museum (Pl. XXIX, 13, 14), one of which is dated in 1630 Śāka = 1708 A. D., and the three others are dated 1653 Ś. = 1731 A. D. One duplicate of the latter date has not been catalogued. The coins are exceptionally broad, and bear legends similar to those of the Assamese coinage. Mr. Gait has recorded that

¹ The prevailing shape is supposed to have been suggested by a statement in the *Joginī Tantra* which describes the Āhōm country as octagonal (Gait, *History*, p. 97).

² Mr. H. N. Wright kindly examined the coins with Persian legends, which were received in May, 1906.

'a number of new Jaintia coins were brought to light by Babu Giris Chandra Dās, Assistant Settlement Officer of Jaintia, and a collection was made which has been presented to the Asiatic Society of Bengal. The collection includes whole coins of Çaka 1591, 1592, 1630, 1653, 1696, 1704, 1707, and 1712; and quarter coins of Çaka 1653 and 1712: the quarter coins alone have the name of the kings who minted them, viz. Bara Gosain and Ram sinha respectively. These coins have been described (with a plate) in the *J. A. S. B.* for 1895, Part I, p. 242' (*Report*, p. 4). The paper referred to, entitled 'Some Notes on Jaintiā History', and chapter XI of Mr. Gait's *History of Assam*, give all the information available on the subject. The A. S. B. collection described by Mr. Gait has not been sent to me.

The Tipperah country (Tripura), which lies to the south of Sylhet and the east of Dacca, is now in part a British District, and in part a native state, known as Hill Tipperah. Mr. Gait (*Report*, p. 4) mentions two coins of Tipperah, one of Govinda Mānikya deva, dated Śāka 1602, the other of Dharma Mānikya deva, dated 1636. The latter was presented to the A. S. B. (*Proc.* 1895, p. 86), but has not come into my hands. The specimen now catalogued, struck by Rāmasinha Mānikya deva and his consort Tārā, is new, but similar to the coins previously known. The reverse device is a grotesque lion with a trident on his back, and the date is 1728 Ś. = 1806 A. D.

The Manipur State, lying between Cachār and the Burmese frontier, was deprived of its independence in 1891 on account of the massacre of Mr. Quinton and his companions (Gait, *History*, p. 343). Some small copper coins with *mā* on the obverse, and the reverse blank, are ascribed to this State by Mr. Rodgers.

Chhotā Udaipur is, I believe, part of Tipperah. The utterly barbarous copper coins assigned to it by Mr. Rodgers are undecipherable to me. The recent copper coins of the Sikim State to the north of Darjeeling are not in any way remarkable.

The dates in the *Report*, which are based on the authority of the Assamese historian Kāśināth, should be accepted rather than those of the *buranjis*. When Mr. Gait (*History*, p. 102) avowed his preference for the latter, he forgot the testimony of the coins.

SECTION XXI

WESTERN AND SOUTHERN INDIA, EXCLUDING VIJAYANAGAR AND MYSORE

INTRODUCTION

THE metric system of Southern India appears to be based upon the weights of two kinds of seeds, the *mañjāḍi* (*Adenanthera pavonina*), averaging about five grains Troy, and the *kaḷaṅḡu*, 'Molucca bean' or 'bonduc nut' (*Caesalpinia bonduc*, *Guilandina bonducella*), which was considered as equivalent to ten *mañjāḍis*. The *rati* seed (*Abrus precatorius*), the base of the metric system of Northern India, was not used in the south in early times, but in practice the *kaḷaṅḡu* weight did not differ widely from the northern standard of 32 *ratīs*, to which the punch-marked silver coins (*ante*, Sect. V) were struck. These punch-marked coins, which occur all over India, north and south, have been considered in Section V with reference to the whole country. The southern specimens may be regarded as roughly equivalent to a *kaḷaṅḡu*. Large classes of ancient thin, flat coins, such as are described in Loventhal's little book, *The Coins of Tinnevely* (Madras, Higginbotham & Co., 1888), are found in the peninsular region, but, not being represented in the Indian Museum or Asiatic Society of Bengal cabinets, may be passed over with this allusion.

The most characteristic southern coinage is that in gold of small pieces known as *fanams*, equivalent in weight to *mañjāḍi* seeds, and of larger pieces known as *hūns*, *varāhas*, or *pagodas*, ten times the weight of the fanam, and equivalent to *kaḷaṅḡu* seeds.

The fanam is a tiny, thin, circular die-struck coin, and I do not know whether it was an independent Dravidian invention or was derived from some foreign model. The pagoda (*hūn* or *varāha*) was developed independently, like the early Lydian coins, from a globule or spherule of gold. The earliest examples, of uncertain date, are either quite plain or have a faint punch-mark in the centre. Specimens of these early coins are catalogued under the sub-head 'Early Anonymous, blank or nearly blank'. Gradually, as in Greece, the globule was

flattened, and became an ordinary die-struck coin. Pagodas continued to be struck until 1819. In 1835 the special southern currencies were superseded by the imperial rupee coinage. The reader will find the numismatic history of the south, so far as it is known, worked out in Elliot's *Coins of Southern India* (Intern. Num. Or., 1885); Tufnell's *Hints to Coin Collectors in Southern India* (Madras, Higginbotham & Co., 1889); Loventhal's work already cited; Dr. Bidie's article, 'The Pagoda or Varāha Coins of Southern India' (*J. A. S. B.*, Part I, 1883, p. 33); and Mr. Thurston's catalogues of coins in the Madras Museum, especially the volume entitled *History of the Coinage of the Territories of the East India Company in the Indian Peninsula* (Madras, Government Press, 1890).

The curious cup-shaped pieces known as *padma ṭankas*, or 'lotus-coins', are heavier than the pagoda, averaging about 58 grains each. Their peculiar form connects them with the coinage of the Western Chālukya dynasty of Kalyāṇi, but their date cannot be determined with accuracy. The gold coins of Jagadekamalla of that dynasty, either J. I (1018-42 A.D.) or J. II (1138-49 A.D.), are now published for the first time (Pl. XXX, 2, 3).

The base silver coins of Vishamasiddhi or Kubja-Vishṇu vardhana, the first king of the Eastern Chālukya dynasty of Vengī (615-33 A.D.), although described by Dr. Hultzsch, have not been figured previously so far as I know (Pl. XXX, 1). The strange broad, thin punch-marked gold coinage of the same dynasty in the eleventh century, which has been known for many years, is represented in the catalogue by a single coin of Śaktivarman or Chālukya chandra.

Two of the rare coins of the Kādamba chiefs of Goa in the twelfth century, one gold and one silver, are catalogued, but unluckily the king's name cannot be read completely on either (Pl. XXX, 5, 6).

The Gāṅga dynasty of Kalinga is represented by eight gold fanams (Pl. XXX, 7) issued by Anantavarma Choḍaganga (1075-1146 A.D.). The capital of this dynasty was at Kalinganagara, the modern Mukhalingam in the Ganjām District (*Ep. Ind.*, iv. 188; *Ind. Ant.*, xxv, p. 322).

The specimens of the coinage of the Hindu state of Travancore (Pl. XXX, 8-15) are all modern, the oldest not being earlier than the eighteenth century. The silver *chakram* is of the same weight as the gold fanam, between five and six grains. The copper *kāsu* or 'cash', weighing nearly ten grains, represents the cowrie of Bengal, and was valued as the eightieth part of the gold fanam (*C. S. I.*, pp. 59, 139). The recent coins of Travancore copy English models.

The representation in the Museum of the Indo-Portuguese, Indo-French, and early Anglo-Indian coinage is so fragmentary that it would be out of place here to go into any detail on the subject. Generally

speaking, the collection of southern coins now catalogued is miserably imperfect, and wholly unworthy of an imperial museum.

For convenience the coins of Vijayanagar and Mysore are treated in a separate section; but, excepting those of the Muhammadan dynasty, they follow the ordinary southern types of pagoda and fanam.

The southern coinage, as a whole, is of far less interest and historical value than the northern, the most characteristic kinds rarely being inscribed or dated. No adequate work on the subject exists, the publications cited above all being imperfect in one way or another. Sir Walter Elliot's work, *The Coins of Southern India*, is the most important, and gives the best general view.

The history of the Chālukya and other dynasties of the Deccan and Peninsula will be found in Fleet's *Kanarese Dynasties* (2nd ed., *Bomb. Gaz.*, vol. i, Part II). The Chālukyan coins are not struck to the southern scale of weights. The gold coins seem to be intended for drachmas, and the coins of the Kādamba chiefs of Goa may be struck to the same weight standard. The Gānga king of Kalinga and Orissa, Anantavarma Chodaganga, who reigned from 1075–1146 A.D., issued heavy gold fanams, weighing between seven and eight grains each. The specimens in the Museum formed a necklace or similar ornament.

SECTION XXII

THE KINGDOMS OF VIJAYANAGAR AND MYSORE

INTRODUCTION

THE most convenient abstract of the history of the kingdom of Vijayanagar will be found in Sewell's *Lists*, vol. ii, p. 243, and fuller information is given in the same author's work, *A Forgotten Empire*. The First Dynasty is represented in the catalogue by five coins, two of Harihara II and three of Deva Rāya II. Kṛishṇa deva Rāya of the Second Dynasty (1509-30 A. D.) is traditionally held to have been 'one of the greatest monarchs that ever ruled the country'. Fourteen of his gold coins are catalogued, the attribution of one being doubtful. The next king, Achyuta, was either a brother or son of Kṛishṇa deva. The two specimens of his coinage have the reverse device of a double-headed eagle monster (*gaṇḍa bheruṇḍa*). I think it desirable, contrary to the practice of previous writers, to call the mythological side of these coins the reverse, and to designate as the obverse the side bearing the king's name. The next king, Sadāśiva, who succeeded as an infant in 1542, seems to have been a son of Achyuta. Two coins are catalogued under his name, of which No. 2 is certainly his, but No. 1 may belong to an homonymous chief of Ikkēri.

The coinage of the Third Dynasty is very poorly represented. Rāma Rāja, to whom four coins are attributed, was killed in 1565 A. D. at the battle of Tālikota, which ruined the kingdom of Vijayanagar; although descendants of the royal house continued to rule as petty chiefs for some time longer. Three coins bearing the name of Venkaṭeśvara belong to one or other of these chiefs, about 1600 A. D.

The best account of the Vijayanagar coinage is that given by Prof. Hultzsch in the article entitled 'The Coins of the Kings of Vijayanagara' (*Ind. Ant.*, vol. xx (1891), p. 301, with two plates). The author gives full references to earlier publications. In *Ind. Ant.*, vol. xxv, p. 318, Prof. Hultzsch has published 'the only silver coin of the Vijayanagara kings that has hitherto come to light'. The

numerous copper coins of the series are not represented in the very poor collection now catalogued.

The kingdom of Mysore grew out of the wreck of the kingdom of Vijayanagar. The catalogue includes only one specimen of the coinage of the early Hindu Rājās, a 'Kanteroy fanam' of Rājā Kamthirava (1628-58 A. D.). The extensive coinage of Mysore during the reigns of Haidar 'Alī and his son Tipū, the Muhammadan conquerors or usurpers, is represented in the Indian Museum only by a few odds and ends. A full discussion of the Mysore coinage will be found in Mr. Thurston's catalogue of the Mysore coins in the Madras Museum (Madras, Government Press, 1888).

SECTION XXIII

THE MEDIAEVAL COINAGE OF CEYLON

INTRODUCTION

THE mediaeval history of Ceylon having been recorded by the native chroniclers in considerable detail with reasonably close attention to chronological accuracy, and having been made readily accessible to European readers in many modern books, no difficulty is felt ordinarily in assigning the extant coins to the proper kings and approximately to correct dates. Exact years cannot be determined because no coin is dated. The only doubt in the attribution of the coins occurs in the case of those bearing the name of Vijaya Bāhu. Several kings of that name ruled in the latter years of the twelfth century and during the thirteenth, to any one of whom the coins might be assigned; but they are attributed usually to Vijaya Bāhu II, nephew of the great Parākrama Bāhu, and this attribution has been followed in the catalogue.

The known coins extend over a period of nearly a century and a half, beginning with Parākrama Bāhu (1153-86), and ending with Bhuvanaika Bāhu who came to the throne in 1296 A.D. They are all substantially identical in type, and are copies of the coinage of the powerful Chōla king, Rājārāja, who reigned on the mainland from 985 to 1011 A.D. The generals of Parākrama Bāhu invaded Southern India in or about the year 1175, and it may be assumed with a high degree of probability that the Ceylonese imitations of the Chōla coinage are all subsequent to that date. No coins are extant of eight of the series of sixteen rulers beginning with Parākrama and ending with Bhuvanaika.

The small collection now catalogued includes specimens of the copper coinage of six of the eight sovereigns whose coins are known, but the rare issues of Niśśanka Malla (1187-96) and Chodaganga (1196-7) are not represented in it, nor are there any examples of the limited gold and silver coinage. The existence of a silver coinage, ignored in Professor Rhys Davids' book, has been fully proved by Mr. Lowsley, who collected numerous genuine specimens. Parākrama Bāhu, when his armies invaded Southern India, evidently was impressed by the huge amount of Rājārāja's coinage in copper. Sir Walter Elliot

observes:—'Copper pieces, the more perfect specimens weighing from 50 to 60 grains, bearing the name of Rāja Rāja, are met with every day. They are brought in numbers to be melted up by the copper-smiths, and one find within my own knowledge in Tanjore yielded upwards of 4,000¹' (*C. S. I.*, p. 133). The Ceylonese monarch exactly copied the proceedings of his model and issued immense quantities of copper coin, but comparatively little of silver and gold. The type introduced by Rājarāja is characterized by a very peculiar image of the king standing on the obverse, and a grotesque monkey-like seated figure on the reverse. The legend in contemporary Nāgarī script is on the reverse. These characteristics, evidently of northern origin, and ultimately traceable, through the Gupta and Kushān coinage, to Greek models, were faithfully reproduced by Parākrama Bāhu and his successors.

The standard coin in this style was the *māsha* or *massa* of about 70 grains; and most of the extant examples in all metals are *massas*. The subdivisional pieces are scarce or rare, as also are the double *massas*. The twenty-five coins catalogued and twelve excluded duplicates are all *massas*, except one small worn piece of Parākrama Bāhu, which now weighs only 8½ grains, but may have been intended for a quarter-*massa*. The octagonal *massa* of Queen Lilāvati (Pl. XXXI, 5) is not mentioned in the books, and seems to be unique.

The first intelligible, although imperfect, account of these Ceylonese coins was given by Prinsep (*Essays*, ed. Thomas, vol. i, Pl. XXXV). They are briefly noticed by Elliot (*C. S. I.*, pp. 108–10), and have been treated at considerable length by Prof. Rhys Davids ('Ancient Coins and Measures of Ceylon', in *Intern. Num. Or.*, London, Trübner, 1877). But Prof. Rhys Davids' account requires numerous corrections and additions, which have been supplied by Mr. B. Lowsley in a valuable essay entitled 'Coins and Tokens of Ceylon' (*Num. Chron.*, 1895, p. 211, Pl. VIII). Abstracts of the history of the period will be found in Prof. Rhys Davids' work, Emerson Tennant's *Ceylon*, and in many other books easily accessible.

SECTION XXIV

COINS OF ARAKAN AND OTHERS

INTRODUCTION

THE few coins described in this section hardly can claim a rightful place in this catalogue, but, having been sent to me, must be disposed of. The little that appears to be known about the history and coinage of Arakan has been published by Sir Arthur Phayre in his treatise entitled 'Coins of Arakan, of Pegu, and of Burma' (*Intern. Num. Or.*, London, Trübner, 1882).

The silver coins with the effigy of a recumbent bull and Nāgarī legends are referred to the 'Chandra' dynasty, supposed to have reigned between 788 and 957 A. D. Coins of this type are found buried in the ground and among old ruins in various parts of Arakan. Several were presented to the Asiatic Society of Bengal, and have been described in the Society's Journal, but those specimens, if still preserved, have not been submitted to me. The examples now described all belong to the Indian Museum cabinet, and there is no record of their *provenance*. No. 1, with the legend *Śrī Śivasya* (? *Givasya*), is not noticed by Phayre. The two thick silver coins, Nos. 8 and 9, are No. 22 of Phayre's Plate II, and were struck in the year 1144 of the Arakanese era, equivalent to 1782 A. D., by Mahā Samadā Rājā, the last king of Arakan, prior to the conquest of the country by the Burmese, who were compelled to cede it to the Indian Government by the treaty of Yandaboo in 1826. These coins have no device, and the obverse legend is repeated, letter for letter, on the reverse.

The coins which I am unable to assign precisely include a little bronze coin of Cambodia, supposed to date from the eighteenth century. Mr. Rodgers has recorded the odd fact that it was obtained at Kāngrā in the Panjāb. Possibly it may have been brought there by a Sikh policeman returning from Bangkok. I am indebted to Prof. Rapson for identifying this piece as Cambodian. The 'symbolical' coin from Burma differs from all of those published by Phayre. I am unable to read the legends on certain inscribed coins. The characters on Nos. 1 and 3 are Nāgarī, but I cannot make sense of them, while the script on

Nos. 2 and 4 is wholly unknown to me. Nos. 7 and 8 are supposed to be Tibetan. I cannot make any suggestion about No. 9, which bears the legend *Jajjapurā* (or *-purī*).
